Portfolio

<https://athan-stef.github.io/PortfolioAthanStefanos/>

Skills

- **SolidWorks**
- **Creo Parametric**
- FEA (**ANSYS**, **Abaqus**)
- **Python, Matlab, C++**
- Manual machining, hands tools
- **OpenVSP**
- Integration
- Stakeholder Management
- Collaboration
- Problem solving
- Presentation and visual design

Education

2022 - Present

Bachelor of Engineering - Aerospace

Monash University

2024 - Present

Minor in Artificial Intelligence

Monash University

Athan Stefanos

Graduate Aerospace Engineer

I am a motivated aerospace engineering student seeking a graduate role in a technically demanding environment. Through my studies and project work, I have developed a strong foundation in aerospace systems and hands-on experience delivering complex engineering projects from concept to implementation. I am driven by challenging problems, enjoy working closely within multidisciplinary teams, and take pride in contributing to the design and development of high-performance engineering solutions. Organized, persistent, and adaptable, I bring a genuine enthusiasm for learning and a strong work ethic to every project I am involved in.

Experience

2023 - 2026

Monash High Powered Rocketry

Flight Systems Engineer, Aerostructures Engineer

Skills include cross-functional teamwork on complex aerospace engineering projects; application of systems engineering methodologies across the full design lifecycle; design, manufacture, and integration of composite rocket airframes and load-bearing structural components; experience with flight systems including parachute recovery systems, avionics integration, and electrical bay structural design; digital structural analysis and simulation (FEA); advanced computer-aided design (CAD). **Certified SolidWorks Associate (CSWA)**. Foundational CFD experience with understanding of aerodynamic analysis workflows.

2025-2026

Jetstar Engineering Internship - Fleet Development

Supported fleet development activities for Boeing 787 aircraft upgrade programs, contributing to the planning and execution of multiple concurrent modification and cabin enhancement projects. Gained experience operating within a large, regulated engineering organisation, including adherence to airworthiness, safety, and configuration management processes. Collaborated with internal stakeholders and external third-party suppliers to coordinate technical inputs, documentation, and program deliverables, developing strong project execution, communication, and professional engineering practice skills.

2025

IC281 Monash Motor Sport Industry Skills Course

Proficiency in engineering measurement tools, hand tools, centre lathe and milling machine. A valuable course that gave me perspective into machining processes and workshop safety.
